

Protal™ Pipeline Coatings

Protective Liquid Coatings

Uses & Applications

- Liquid coating of girth welds and tie-ins
- Liquid coating of welds for boring applications
- Repairs to FBE, fittings and fabrication
- Rehabilitation of existing pipelines
- Coating of cadweld areas

Protal™ Pipeline Coatings

Protal 7125 being brush applied in arctic temperature conditions.

Protal Repair Cartridge application.

Protal ARO being sprayed applied.

Features

- Easy to apply (brush, roller or spray)
- Fast cure
- High build (up to 70 mils in one coat)
- Outstanding cathodic disbondment results (6mm @ 230°F)
- Excellent adhesion (compliments FBE coated pipe)
- High abrasion resistance for drilling applications
- 100% solids (no solvents)
- Safe and environmentally responsible
- Does not shield cathodic protection

Pipe coated with 30 mils of Protal 7900HT.
